

Key features of the 24 book series

- Each of the 16-page full colour, early readers links directly to the *Australian Curriculum: Mathematics* across all three strands and all four sub-strands
- 24 reading levels for age-appropriate reading development from Foundation to Year 2
- Available as print books and in three digital formats
- Consistent sentence structure and use of high frequency words appropriate to each reading level to help children develop fluency, comprehension and vocabulary
- Detailed scientific information to **empower parents and teachers** to engage children in exploratory conversations about mathematics, connected to what students learn in the classroom via the *Australian Curriculum: Mathematics*
- *Before, during and after* reading strategies equip parents to actively support their child's emerging literacy.
- Mathematics concepts presented in everyday contexts familiar to Australian kids and parents

Affordable books that add diversity to your home reader and guided reader libraries

Unbeatable Prices!

Print books

24 Book set: only \$99.90!

At this price you can afford multiple sets to ensure that all F-2 students can enjoy the *Millie the Mathematician* series at your school. This is half the price of comparable early reader sets from other publishers.

Prep 6 - Book set: only \$33.90!

The three different eight book sets align to learning outcomes at the Foundation year, Year 1 and Year 2 respectively.

Year 1 and 2 8-Book set: only \$49.90!

The three different eight book sets align to learning outcomes at the Foundation year, Year 1 and Year 2 respectively.

Individual titles: \$6.49

Purchase multiple copies of individual titles for use as guided readers in the classroom.

Interactive e-books

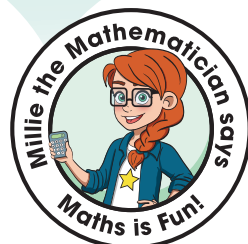

Download individual titles or book sets from the iBooks Store directly to your mobile or tablet device.

24 Book set: \$14.99

Prep 6 Book set: \$5.99

Year 1 and 2 9 Book set \$8.99

Individual titles: \$1.99

Millie the Mathematician

EARLY READER SERIES

A great new addition to your home reader and guided reader libraries

**Engaging Kids
Empowering Parents
Enriching Classrooms**

Millie the Mathematician early reader series

Ignite children's interests in both reading and science

The *Millie the Mathematician* early reader series is a new take on early readers, linking reading development directly to the *Australian Curriculum: Mathematics*.

The series features an engaging, cool mathematician, named Millie, who presents interesting mathematical facts to encourage kids, parents and teachers to explore and discuss mathematic concepts while developing and improving reading literacies and fluency.

Empowering parents and teachers

Learning to read is the single most important life skill that parents and teachers can instil in children. Raising awareness and developing skills in Science, Technology and Mathematics (STeM) to allow them to thrive in the 21st century is also vitally important. The *Millie the Mathematician* early reader series **empowers parents and teachers to do both**.

Millie the Mathematician encourages parents, teachers and kids to jointly explore and discuss mathematical ideas while improving the child's reading ability.

Aligned to the AC: Mathematics

Specifically linked to the *Australian Curriculum: Mathematics*, the *Millie the Mathematician* early reader books are suitable for use as home readers or as in-class guided readers. All three strands (Mathematics Understanding, Mathematics as a Human Endeavour and Mathematics Inquiry Skills) and all four sub-strands (Biology, Chemistry, Physics and Earth and Space) are specifically and overtly addressed.

This unique 24 book series targets developing readers (from F-2) with age appropriate text to improve reading literacy and fluency - while at the same time addressing scientific literacy.

Available in multiple formats

Print books - Available in the full 24 book set, in three 8 book sets, or as individual titles.

Interactive e-books - Fully interactive e-books featuring full-text narration and Millie the Mathematician voice-over. **Download all 24 books from the Apple iBook store for \$14.99** - unbeatable value!

Video books and online books - featuring full narration, available free of charge for classroom use when you purchase the 24 book set.

Free classroom resources!

When you purchase a full set of 24 print books, all 24 video books and all 24 online books will be made available free of charge for use in the classroom.

To view these wonderful digital resources visit www.milliethemathematician.com.au

Wow! 24 e-books for \$14.99. That is cool! And so is Mathematics.

Written by Australian educators

...for Australian classrooms and homes.

The authors have collaboratively drawn on their experiences as mathematics educators, early childhood teachers and parents to create an interesting and diverse range of books to connect mathematical concepts to everyday circumstances that children, teachers and parents can relate to.

Engaging Kids, Empowering Parents, Enriching Classrooms

24-book series · PM levels 1-24 · Linked to the *Australian Curriculum: Mathematics* · 3 strands · 4 sub-strands · equal emphasis across all
